Decreasing sequence

A sequence $u_1, u_2, ...$ is called *decreasing* if $u_n \ge u_{n+1}$ for all $n \ge 1$ (so $u_1 \ge u_2 \ge u_3 \ge \cdots$). It is called *strictly decreasing* if $u_n > u_{n+1}$ for all $n \ge 1$.

See also increasing sequence.
